

ERD Diagram

Entity	Attributes	Relations
Customer	id (PK), username, email, password	Places → Booking (1 to many)
Admin	id (PK), username, email, password	Manages → Flight (1 to many)
Staff	id (PK), username, email, password	Manages → Booking (1 to many)
Booking	id (PK), booked_seats, status, created_at	Includes → Flight (many to 1)
Flight	id (PK), flight_number, origin, destination, departure_time, arrival_time, available_seats	← Included by Booking

The ERD represents five main entities: Customer, Staff, Admin, Booking, and Flight.

- A Customer can place multiple bookings, each stored in the Booking entity.
- A Booking includes a reference to a Flight and tracks seat count, status, and time.
- Admin users manage Flights, and Staff can manage Bookings and update their status.
- The Flight entity holds flight info like number, origin, destination, and available seats.
